Professional Summary

Python Backend Developer with 2+ years of experience in building scalable web applications and RESTful APIs. Skilled in Python, Flask, Django, SQL, and PostgreSQL. Experienced in designing microservices-based architecture, optimizing backend performance, and deploying applications using Docker and AWS. Strong understanding of Git-based version control and agile development practices.

Technical Skills

- Languages: Python, SQL
 - Frameworks: Flask, Django, FastAPI
 - APIs: REST APIs, JSON, JWT Authentication
 - Databases: PostgreSQL, MySQL
 - Tools: Git, GitHub, Docker, Postman
 - Cloud: AWS (EC2, S3 basics)
 - Architecture: Microservices, MVC
-

Professional Experience

Backend Developer

TechNova Solutions Pvt Ltd | Jan 2024 – Present

- Developed scalable backend services using Python, Flask, and Django
- Designed and implemented REST APIs for web and mobile applications
- Integrated PostgreSQL database with optimized query performance
- Built authentication system using JWT and OAuth2
- Deployed applications using Docker and AWS EC2

- Improved API response time by 35% through optimization techniques
-

Junior Python Developer

CodeWave Technologies | Jun 2022 – Dec 2023

- Assisted in building RESTful APIs using Flask framework
 - Managed database operations using SQL and PostgreSQL
 - Worked with Git and GitHub for version control and collaboration
 - Fixed backend bugs and improved system stability
 - Supported frontend team in API integration
-

Projects

Job Portal Backend System

- Built backend for job listing platform using Django
- Implemented user authentication and role-based access control
- Designed REST APIs for job posting and application tracking

Resume Screening System (ML-Based)

- Developed backend system using Flask and Python
 - Integrated machine learning model for resume classification
 - Processed PDF/DOC resumes and extracted text for analysis
-

Education

B.Tech in Computer Science

National University of Technology | 2019 – 2023

Certifications

- Python for Backend Development – Coursera
- AWS Cloud Practitioner Essentials
- REST API Development with Flask
