

Python Backend Developer

Name: Rahul Sharma

Summary:

Python Backend Developer with strong experience in **Python, Flask, Django, REST APIs, SQL, PostgreSQL, Git, GitHub**. Skilled in building **scalable web applications, API integration, and performance optimization**. Experience with **Docker, AWS, and microservices architecture**.

Skills:

Python, Flask, Django, REST APIs, SQL, PostgreSQL, Git, GitHub, Docker, AWS, Microservices

Experience:

- Developed backend services using **Python, Flask, Django**
- Built and integrated **REST APIs**
- Managed databases with **SQL and PostgreSQL**
- Used **Git and GitHub** for version control
- Worked with **Docker and AWS**
- Designed **microservices architecture**
- Optimized backend performance

KEY HIGHLIGHTS

- Built multiple REST APIs for real-world applications
- Strong understanding of backend system design principles
- Experience in deploying and managing backend services
- Ability to work in collaborative development environments
- Focus on writing clean, scalable, and maintainable code
