

Python Backend Developer

Rohan Verma

📍 Singapore | ✉ rohan.verma.dev@gmail.com | 📞 +65-9112-3344

Summary

Backend Developer specializing in Python-based web applications with strong expertise in Flask, Django, REST APIs, SQL, PostgreSQL, and microservices architecture.

Experienced in building high-performance backend systems and working with Docker and AWS for deployment.

Skills

Python, Flask, Django, REST APIs, SQL, PostgreSQL, Git, GitHub, Docker, AWS, Microservices

Experience

- Built RESTful backend services using Flask and Django frameworks
- Developed APIs for authentication, data processing, and integrations
- Designed database schemas using PostgreSQL for scalable applications
- Collaborated using Git and GitHub for code version management

- Used Docker for application containerization and deployment
- Worked on AWS services for hosting backend applications
- Optimized backend logic to reduce response time and improve efficiency
